

Crazy for Orangutans

PHOTOS BY SUZI ESZTERHAS

If you're not already wild about orangutans, here are five reasons why you should be.

1

Orangutans are very smart. They can remember where all the fruit trees grow in the rainforest.

2

Orangutans are amazing acrobats. They swing from branch to branch, collecting food to eat.

3

An orangutan's feet are just like its hands. Orangutans use their feet to grip and hang on.

4

Baby orangutans stay with their moms longer than most kinds of animals. It takes about eight years for the babies to learn how to live alone in the forest.

5

Orangutans love to **PLAY!**
